

September 29, 2012

Dear Sir/ Lady:

Human Rights and International Law troubles in Tallinn require immediate intervention. A Jewish paramilitary group, which includes NATO and the Estonian military, implements satellite nuclear technology to constantly scan and attack my brain and internal organs. Estonian policemen protect their activities and participate in biotechnology torture, which involves:

1. Filming the apartment where I stay (*which officially belongs to a fabricated family, used to study the handling of international and national taxation for military purposes and political repression*), talking on the TV set, laptops, radio, and mp4 players, attacking my brain with a satellite signal that produces pain and burning sensation, hitting internal organs, depriving me from sleep and work, interfering all my communications, sabotaging my company files and servers and beaming my head with a drone of a very high (*jumping*) frequency. Several neighbors are involved in this hostage-taking, including a family living in the flat directly above and employees of the UK embassy.
2. Filming streets and public places to attack my brain. Available photographs depict who is being sent to Tallinn from abroad and prove the participation of the Estonian police and military. The public prosecutor office was asked to intervene to no avail. (*Bandits interfering my laptop just called me a liar.*)
3. Very frequent threats of seclusion in a psychiatric hospital, imprisonment, deportation and more severe torture.

The United Nations received a message via its official website asking to contact Mr. Kofi Annan (*after he had quit as the Syrian mediator*) since mentioned individuals carry out acts of terrorism on Syrian territory, apparently as part of the strategy of a Swedish banking consortium. The Estonian president and members of his security have repeatedly partaken in torture that could potentially extend to (*and be used to silence*) other witnesses. A New Jersey financial team, which includes rich emigrants from former USSR republics, deployed agents in Tallinn in connection with the 2012 Russian Presidential elections and foreign investments (*I talked on the phone with a staff member of a New Jersey Senator and received an email from Senator John McCain*).

The French police (*especially policemen linked to the station on Rue de Vaugirard, Paris*) have targeted me for years in the context of the NATO invasion of Libya and the assassination of Muammar Gaddafi (*as understood later*). The European Court of Human Rights received a petition of a case *Pedroso vs France* **in 2009**, and the Evidence Gathering Committee of the International Criminal Court in The Hague, **from as early as 2004**, accepted information about specific attacks on civilian aircraft (*and other mass murders*), perpetrated with the assistance of the armed forces of several countries (*including France and the USA*).

I urge you to put diplomatic pressure on the Estonian (*and French*) police and military forces to stop this selective assassination operation and start criminal proceedings against mass murderers currently present in France. In any of the following websites you shall get acquainted with particulars:

Thank you for any efforts to stop the military Mafia,
M. Pedroso Artime
